

Geo-Environmental Services For Residential Developers

Resource and Environmental Consultants (REC) are a multi-disciplinary Health, Safety & Environmental Consultancy with offices located throughout the UK and Ireland, providing valued clients with high quality, solution driven consultancy.

With significant experience in delivering a wide range of projects, from small sites with specific restraints to major international infrastructure schemes, we are able to provide the correct scope of works and specific methodologies to suit any project and budget.

REC are able to offer a complete geotechnical and environmental consultancy from pre-planning stage to project completion. This can be specifically tailored to suit your needs and can include work in the following areas:

Services Overview

- Contaminated land Phase I Desk Study and Phase II Site Investigation
- Geotechnical site investigation for foundation and road/pavement design
- On-site testing including plate load testing and BRE 365 Soakaway tests
- Detailed Quantitative Risk Assessments
- Remediation Strategies
- Assessment and Remediation of Asbestos Contaminated Sites
- Material Management Plans.

For further information on any of the REC Geo-Environmental services, or how we can assist you with your requirements, please contact us on **0845 676 9303** or email geoenvironmental@recltd.co.uk. Alternatively further information can be viewed via our website www.recltd.co.uk.
