

# Ecology and Wildlife Consultancy

Every year millions of pounds are spent on sites for development, only to discover serious hidden complications when it comes to gaining planning permission – because the land or buildings are home to legally protected wildlife species.

- A pre-purchase ecological survey could save you from making a very expensive mistake.
- An ecological strategy can make the difference between planning permission being refused and your project becoming viable.

Through our partner organisation, CES Ecology, we can quickly assess whether you need a site survey and/or mitigation work for your development scheme. A simple chat – in confidence and without obligation – could make a significant difference to your project's outcome.

We are able to offer a wide range of services for our clients, from undertaking initial site appraisals, to the design and implementation of large-scale ecological mitigation projects.

Our Ecology and Wildlife Consultancy services include:

- Pre-purchase site investigation surveys
- Protected species and habitat surveys
- BREEAM land use and ecology assessments
- Code for sustainable homes assessments
- Wildlife habitat design, creation and management
- Protected species mitigation
- Amphibian, reptile and water vole fencing

For further information on any of the REC Ecology and Wildlife Consultancy services, or how we can assist you with any environmental requirements, please contact us on **0845 676 9303** where one of our consultants will be on hand to assist. Alternatively, further information can be viewed via our website [www.recltd.co.uk](http://www.recltd.co.uk).
